DEBLEENA SARKAR

Senior Frontend Engineer | React Architecture

Kolkata, India | +91 7420986417 | sarkardebleena18@gmail.com | linkedin.com/in/debleena-sarkar

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5.5+ years of end-to-end experience architecting, designing, and delivering high-scale enterprise web applications. Proven track record of translating complex business requirements into production-ready, React applications with robust state management, secure authentication flows, and reusable component architectures. Recognized for strengthening identity compliance, improving onboarding accuracy, reducing production defects, and mentoring engineering teams to ship stable releases on Agile timelines. Adept at thought-partnering with cross-functional stakeholders to define scope and drive delivery.

CORE COMPETENCIES

End-to-End Web Application Development | React.js Architecture & Component Design | Redux State Management
Identity & Authentication Systems (eKYC, SSO, Azure AD) | Performance Optimization | Scalable UI Engineering
Agile / Scrum Delivery | Cross-Functional Collaboration | Mentorship & Technical Leadership

TECHNICAL SKILLS

Frontend: React.js, React Native, JavaScript (ES6+), TypeScript, HTML5, CSS, Redux, Context API, React Hooks
UI Frameworks: Material UI (MUI), Ant Design, StoryBook, Responsive & Adaptive Design
Authentication & Integration: Azure Active Directory (SSO), eParichay (UID/VID), eKYC Systems, REST APIs
Engineering Practices: Component Architecture, Reusable Component Libraries, Performance Optimization
Methodologies: Agile / Scrum, Sprint Planning, Code Reviews, Pair Programming
AI-Powered Tooling: GitHub Copilot, CODEX, Claude, Generative AI
Tools & Platforms: Git, Azure DevOps, CI/CD Pipelines

WORK HISTORY

Deloitte — May 2024 – Present

Senior Frontend Developer

Client: BPCL — Customer Enrollment & eKYC Onboarding Platform

- Independently architected and delivered a dual-workflow onboarding system (eKYC + manual enrollment), enhancing operational flexibility across nationwide LPG distribution channels and enabling the successful rollout of PMUY 3.0.
- Engineered eParichay identity authentication module with UID/VID verification, biometric validation, and OTP-based multi-factor authentication, strengthening regulatory identity compliance standards.
- Designed a Redux-based state persistence layer that auto-populated Aadhaar-verified customer data, reducing data-entry errors and increasing onboarding accuracy at scale.
- Built a dynamic form engine and optimized client-side routing framework to support configurable, high-scale enrollment workflows across diverse distribution channels.
- Established reusable UI component patterns and implementation standards, reducing production defects and accelerating sprint delivery velocity across frontend engineering teams.
- Mentored junior and mid-level frontend engineers through code reviews, technical guidance, and quality assurance practices, elevating team-wide code quality.

Client: HSBC — Enterprise Data Viewer Platform

- Spearheaded development of a React-based enterprise data visualization platform enabling secure, role-based management of sensitive customer asset data.
- Implemented Azure Active Directory (Azure AD) SSO integration, significantly strengthening application authentication security and enforcing enterprise identity governance.
- Designed centralized Redux workflows for consistent, cross-module data handling, optimizing application stability and reducing state inconsistency defects.
- Collaborated with business stakeholders to translate complex financial domain requirements into scalable, maintainable UI modules aligned with Agile sprint deliverables.

Tata Consultancy Services (TCS) Nov 2020 – May 2024

Frontend Developer

- Engineered responsive, high-performance enterprise web and React Native mobile applications across large-scale retail platforms serving millions of users.
- Built and maintained reusable component libraries adopted across multiple product verticals, significantly improving development efficiency and code consistency.
- Implemented structured Redux state management architecture, enhancing application maintainability, testability, and long-term scalability.
- Partnered with UX designers and product owners in cross-functional Agile teams to deliver user-centric UI features aligned with business goals and release timelines.

ACHIEVEMENTS

- **Client Centricity (March 2026)** — Recognized for delivering exceptional client experience and receiving client appreciation.
- **Efficiency Mastermind Award (Nov 2025)** — Received leadership recognition for effectively managing project escalations and ensuring on-time delivery.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Front-End Web Development with React — Coursera
- React Native + Hooks — Udemy

EDUCATION

Siksha 'O' Anusandhan University (ITER) 2016 – 2020

B.Tech — Electronics & Communication Engineering (ECE) Bhubaneswar, India

Loyola School (ICSC) 2016

Higher Secondary (12th) Jamshedpur, India
